Security Tech Germany

System Wavy Line pro High security level and comfort

All cylinder illustrations with optional drill protection

Authorization monitoring in three dimensions

- The first row of pins is activated by a 6-fold coded wavy line
- Additional lateral dimples in the second row of pins
- Blocking ball with coded rib

Coded rib with blocking ball

- Blocking ball provides resistance to cylinder manipulation (e.g. picking)
- A coded rib on the key is used to bypass the blocking ball
- Cylinder rotation is blocked when manipulating without the coded rib

System benefits

- Up to 10 active locking elements combined with the blocking ball offer a high level of key security
- Reversible key system ensures easy handling
- Upright key insertion
- Solid and stylish key design
- Patented locking technique provides legal protection against copying
- Profile cylinders are manufactured according to DIN EN 1303, DIN 18252 and ISO 9001:2008
